ABOUT US

VetsBrands is a Company that was founded by Dr Ockert Botha (BVSc) in 2012

VetsBrands is wholly owned by a group of likeminded Veterinarians and does not have any non-Veterinarian shareholders

The **VetsBrands** group of Vets believe in the holistic approach to animal health. This includes the need for optimal nutrition as well as the combination of Medicines and Nutraceuticals

The **VetsBrands** range of products is sold exclusively by Veterinarians and Vet owned Vet Shops

VetOnly™ ad infinitum

Dear Horse Owner/Trainer

VetsBrands believes that a veterinarians' role in maintaining your horse's health is vital! Your veterinarian is best trained to advise you on what products are best suited for the disease condition your horse is suffering from. Furthermore veterinarians use a system called "**ACCLAIM**"[1] to evaluate Nutraceuticals. This ensures that your beloved horse will receive the best possible product for the prevention and management of health related problems. Your veterinarians, taking into account their specialist scientific knowledge, will also ensure that products formulated on the principle of "**Evidence Based Medicine**" and "**Science Based Dosages**", be recommended.

The VetsBrands range of products are formulated and manufactured strictly according to the above mentioned scientific principles and as such is available exclusively from Veterinarians. VetsBrands products are incredibly affordable when compared to other retail products. The reason for this is that the majority of veterinarians adhere to our recommended retail pricing structure. By purchasing from your Veterinarian you will be protected from the exorbitant prices, and in some cases scientifically inferior products often sold by non-veterinary owned retail outlets.

As a result of the unique distribution channel offered to Veterinarians they will in most cases be able to order and supply your chosen VetsBrands product (if not in stock) within 24 hours of the order being placed. To facilitate this process for you as client we have appointed a dedicated equine consultant, Danielle West, to liaise with you as client on the VetsBrands range of equine products. Danielle has an in depth knowledge of keeping horses fit and healthy. Being a registered horse trainer, Danielle knows that it is critical to treat and maintain your horse's condition in a scientific manner, but most importantly to diagnose the health condition correctly. Working in close collaboration with Dr. Ockert Botha, our Veterinarian with over 30 years of knowledge in veterinary product development and Equine Health, you as horse owner will receive exceptional Scientific advice and not just "hear say".

Please feel free to contact Danielle for any technical enquires regarding VetsBrands Equine Products or to facilitate the optimal treatment of your horse in conjunction with your Veterinarian.

ARTHROFOCUS

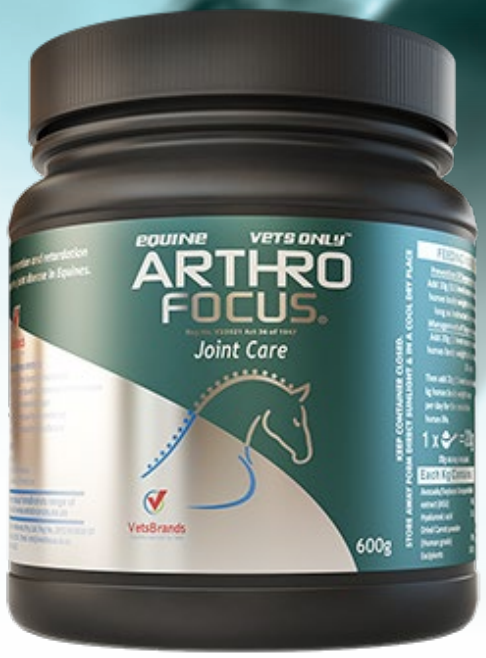
AS A NUTITIONAL AID IN THE PREVENTION AND RETARDATION OF DEGENERATIVE JOINT DISEASE IN EQUINES

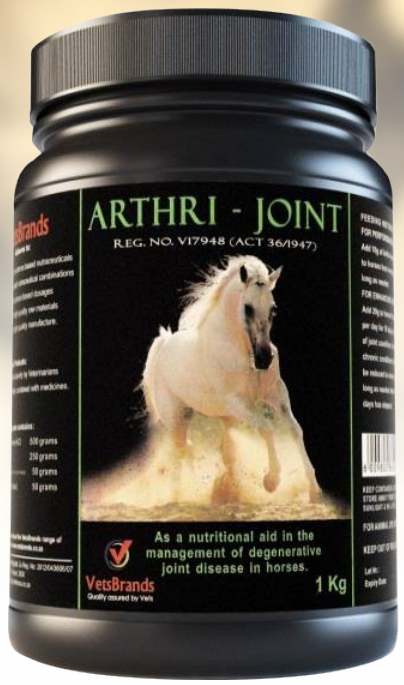


COMING SOON

ARTHRI-JOINT

Reg No V17948 Act 36/1947

AS A NUTRITIONAL AID IN THE MANAGEMENT OF DEGENERATIVE JOINT DISEASE IN HORSES



COMPOSITION

Each kilogram contains:

Glucosamine HC	500g
MSM	250g
GLM	50g
Moisture(max)	50g

ADVANTAGES

- Evidence based raw materials
- Science based dosages
- Extremely affordable
- Excellent clinical results achieved
- High levels of **Glucosamine and GLM** ensures potent anti-inflammatory effect

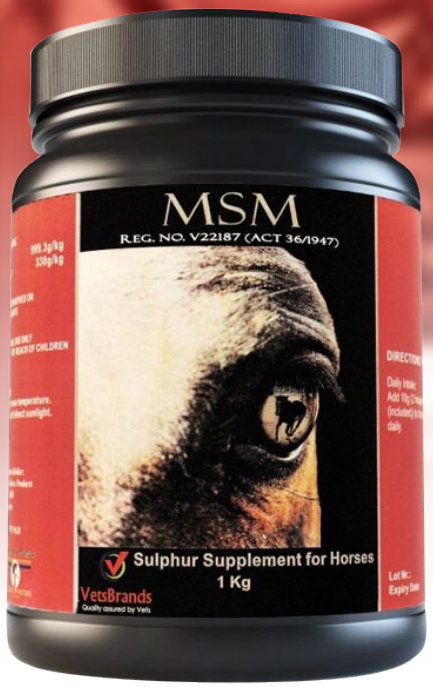
PACKAGING

1kg (25-100 day supply)

MSM

Reg No V22187 ACT 36/1947

AS A NUTRITIONAL AID IN THE MANAGEMENT OF INFLAMATORY AND DEGENERATIVE JOINT DISEASES IN HORSES



COMPOSITION	
Each kilogram contains:	
MSM	999.3g
Sulphur	33g

ADVANTAGES

- Contains the highest grade of maximum potency MSM available
- Anti-inflammatory effect restores mobility without further compromising joint health
- Safe to use with no side effects
- Extremely cost effective

PACKAGING

1kg (100 day supply)

PERFORMANCE POWDER

Reg No V17946 ACT 36/1947

AS A NUTRITIONAL AID IN THE SUPPORT OF PERFORMANCE, HEALTH, RECUPERATION AND OPTIMAL GROWTH IN HORSES

COMPOSITION

Each kilogram contains:

Thioctic Acid	1600mg
Vitamin B1	100mg
Vitamin B2	200mg
Vitamin B6	200mg
Vitamin B12	1500mcg
Pangamic Acid (Vit B15)	500mg
Vitamin E	400mg
Vitamin K	100mg
Biotin	10mg
Brewer's Yeast	160mg
L-Cartine	500mg
Liver Extract	140g

ADVANTAGES

- Ensures that maximal physiological performance is reached during events without becoming unmanageable
- Synergistic action of evidence based raw materials ensures optimal results
- Regular use ensures optimal recovery time after event by reducing lactic acid build up
- An aid in recovery from disease by stimulating appetite and supporting liver function
- An aid in recovery from disease by supporting appetite and optimal liver function. Ideally suited in supportive treatment of biliary, toxin and drug induced diseases
- Enhances optimal health and growth in foals

PACKAGING

1kg
50 days therapeutic use
100 days supportive use

MULTI-MUNE

Reg No V22187 ACT 36/1947

A NUTRITIONAL AID ACTING AS A PRE & PROBIOTIC, IMMUNE STIMULANT, AS WELL AS HAVING A TOXIN BINDING AND ANTI-OXIDANT ACTION

COMPOSITION
Each kilogram contains:
Equine Specific Pro-Biotics
Pre-Biotic (MOS, FOS)
Beta 1/3-1/6 D Glucan
Myco-toxin binders
Grape skin Extract (anti-Oxidant)
Garlic Powder

ADVANTAGES
• Unique evidence based raw material combination • Ensures optimum immunity and intestinal health • An aid in management of chronic infections and detoxing in horses • As an aid in preventing enteritis and raising healthy foals • Uniquely formulated to assist in the detox of horses • An aid in prevention of enteritis. • A support in raising of healthy foals

PACKAGING
1kg (25-50 day supply)

EDGE-OFF

Reg No V20062 ACT 36/1947

A NUTRITIONAL AID IN THE CALMING OF FRACTIOUS HORSES WHILST ACTING AS A TRAINING AID

COMPOSITION

Each kilogram contains:

L Tryptophane
Valerian Root Extract
Mg AAC
Thiamine
Vitamin B6
Folic acid
Ascorbic acid
Dextrose

WARNING

- Not to be used in pregnant mare
- Not to be used during events
- FEI withdrawal period should be adhered to

ADVANTAGES

- Contains a unique blend of evidence based synergistically acting natural anxiolitics including Valerian Root
- A natural aid in managing over eager horses during training and eventing
- A natural traveling aid for difficult traveller
- Minimizes bad behaviour and aggressive tendencies in horses
- Does not reduce the competitive drive during events

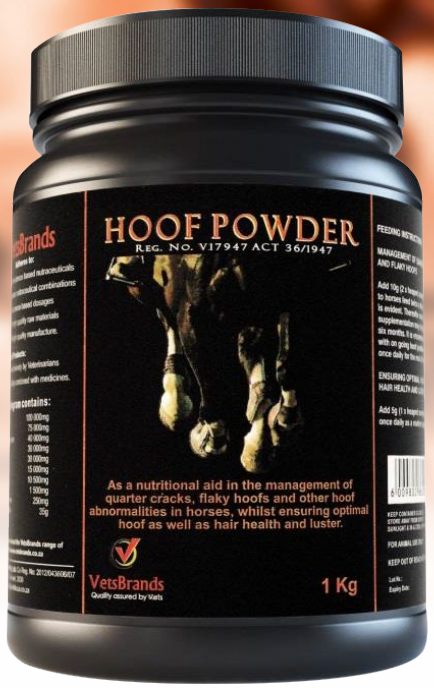
PACKAGING

500g (12 day supply)

HOOF POWDER

Reg No V17947 ACT 36/1947

AS A NUTRITIONAL AID IN THE MANAGEMENT OF QUARTER CRACKS, FLAKY HOOVES AND OTHER HOOF ABNORMALITIES IN HORSES, WHILE ALSO ENSURING OPTIMAL HOOF HEALTH



COMPOSITION

Each kilogram contains:

Methionine	100g
Biotin	1.5g
MSM	30g
Zinc AAC	10.5g
Beta Carotene	250mg
Lysine	75g
Vitamin E	30g
Inositol	15g
Choline Chloride	40g

ADVANTAGES

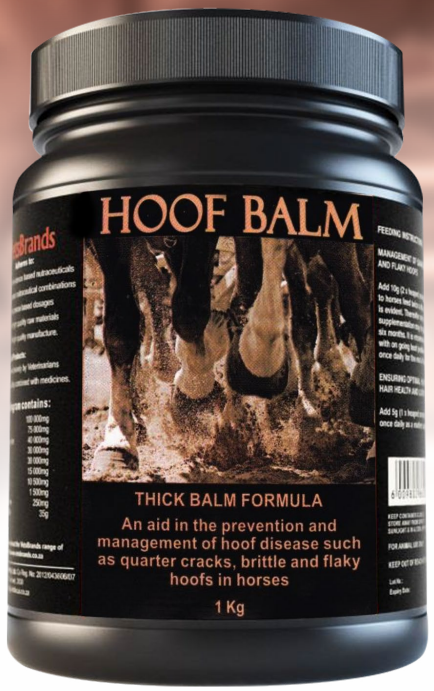
- Contains exceptionally high levels of top quality bio-available essential active ingredients (Biotin, Methionine, Zinc)
- Unique addition of MSM, Lysine and Beta Carotene improves efficacy when compared to other products
- Combines well with VetsBrands Hoof Balm to maintain optimal hoof health
- Extremely cost effective in spite of the uniquely superior formulation

PACKAGING

1kg
50 days therapeutic use
100 days supportive use

HOOF BALM

AS AN AID IN ENSURING OPTIMAL HOOF HEALTH AND PREVENTION OF HOOF DISEASE



VET PRESCRIBED

COMPOSITION

Each kilogram contains:

Chlorocresol 0.5%

Purified Lanolin

Petroleum Jelly

High quality Bees wax

ADVANTAGES

- Regular use ensures growth of a healthy pliable hoof
- Prevents hoof dehydration and brittleness
- Highest quality raw materials used
- Extremely economical
- Extended residual action ensures once a day lower application rate
- Combines well with VetsBrands Hoof Powder to ensure optimal hoof health

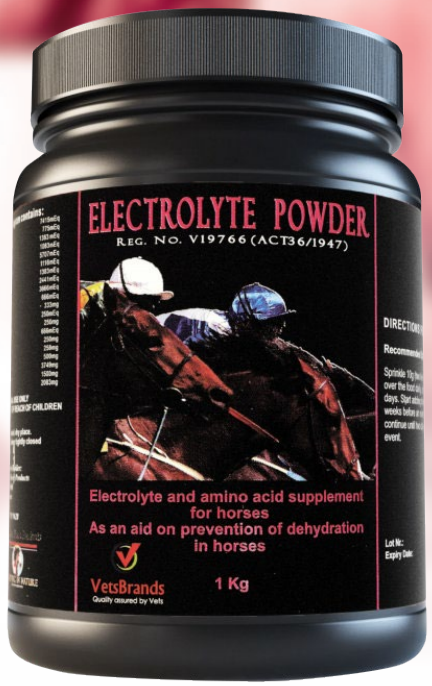
PACKAGING

1kg (100 day supply)

ELECTROLYTE POWDER

Reg No V19766 ACT 36/1947

ELECTROLYTE AND AMINO-ACID SUPPLEMENT FOR HORSES - AS AN AID IN THE PREVENTION OF DEHYDRATION DURING EVENTS (EXCLUDING ENDURANCE HORSES)



VET PRESCRIBED

COMPOSITION

Each kilogram contains:

Sodium	7415mEq
Magnesium	1383mEq
Chorine	5707mEq
Potassium	775mEq
Calcium	1083mEq
Sulfate	1383mEq
Lactate	1116mEq
Citrate	2441mEq
Mehionine	666mEq
Lysine	36666mEq

As well as a range of non-essential Amino-Acids

ADVANTAGES

- Scientifically formulated for use during short distance events.
- Extremely palatable powder for use as a drench or in food as well as in drinking water
- Includes essential and non-essential amino-acids that improves electrolyte absorption and distribution
- Ideal as a pre-transit drench
- Specifically formulated for oral rehydration of horses and foals during and post enteritis

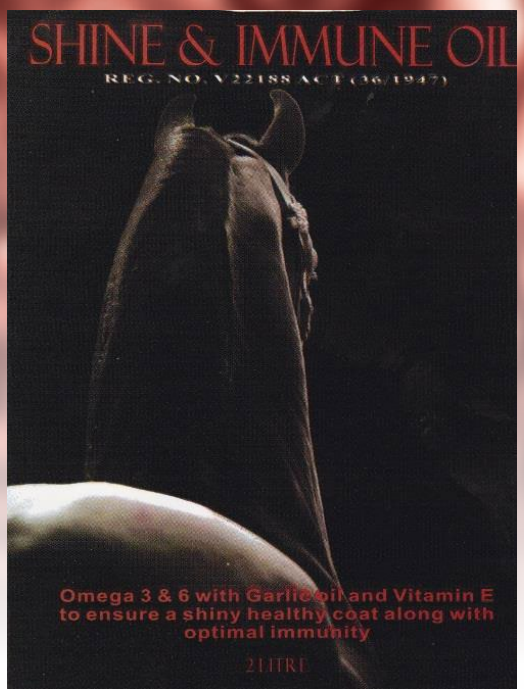
PACKAGING

1kg (100 day supply)

SHINE & IMMUNE OIL

Reg No V22188 ACT 36/1947

PLANT BASED OMEGA 3 & 6 OIL WITH GARLIC AND VITAMIN E TO ENSURE A SHINY HEALTHY COAT AND OPTIMAL IMMUNITY



VET PRESCRIBED

COMPOSITION

Each litre contains:

Wheat Germ Oil
Evening primrose Oil
Linseed Oil
Canola Oil
Garlic Oil Extract
Sunflower oil
Vitamin E Acetate

Contains a PROPRIOTORY BLEND OF HIGH POTENCY PLANT BASED OILS and Vitamin. E

WARNING

Not indicated for use in horses diagnosed with allergic skin diseases.

ADVANTAGES

- Affordable Omega 6 oil specifically developed for horses
- Ensures optimal shine, skin and hair health
- Reduces dry skin and dandruff
- The addition of Garlic oil may aid in repelling insects
- Does not cause behaviour changes ("horses going hot") and it does not contaon corn oil

PACKAGING

2 & 5 litre (100-250 day supply)

SUMMERSPRAY

A WIPE AND SPRAY ON REPELLANT FOR PROTECTION AGAINST MIDGES (CULICOIDES), MOSQUITOES AND STABLE FLIES

-NO-
CITRONELLA

PROTECTS AGAINST AHS

COMPOSITION

Each litre contains:

Diethyl Toluamide (DEET) 15%
Piperonyl Butoxide 1%
Eucalyptus oil
Tagete oil
D-Limonene
Alpha Terpineol

DIRECTIONS

SummerSpray should be applied early mornings and late afternoon during Spring, Summer and Fall when insect activity is high. Brush animal's coat to remove excess dirt and dust if needed.

Apply spray to horse's coat to cover an area of 625cm2 per single pump spray. Make sure that all areas of the horse's body are covered. Pay particular attention to the legs and lower body areas were the skin is thin and hairless.

Do not spray mist around the head and eyes. Dampen a soft cloth with the spray and apply well to the head whilst avoiding contact with the eyes.

ADVANTAGES

- Extensive GLP trials confirm exceptional Culicoides and Mosuito repellency
- Exceptional clinical efficacy also seen in the repellency of flies.
- Superior residual action exceeds all other repellents
- For use during Spring, Summer and Autumn when insect activity is high
- Contains no Citronella oil - that attracts Culicoides
- Contains four highly effective Mosquito and Midge repellent oils that act synergistically with DEET
- Exceptional safety in horses, mares in foal and foals when used according to instructions proven over a five year field trial
- Exceptional repellency repellent effect of Summer Spray prevents mosquitos and midges from taking blood meals and thereby prevents insect born diseases and Summer itch.
- A must for preventing against AHS, of which more and more sightings are being reported

PACKAGING

125 ml bottle with spray applicator for easy use during events and for use on dogs.

1 litre bottle with spray applicator supplied
For approximately 20 days per horse

5 litre bulk pack without spray applicator
For approximately 100 days per horse

ICEVET

A HERBAL COOLING GEL THAT ACTS AS AN AID IN THE MANAGEMENT OF INFLAMMATORY CONDITIONS OF MUSCLES AND TENDONS

VET PRESCRIBED

COMPOSITION

Each litre contains a proprietary blend of:

Menthol

Oil of Wintergreen

Eucalyptus oil

ADVANTAGES

- Naturally reduces swelling and recuperation of sore and inflamed muscles and tendons
- Clinical trials confirmed that this product is event compatible when used strictly according to instructions.
- Bandageable formulation will not cause blistering
- Combines well with the use of MSM

DIRECTIONS

With bandage:

Apply Ice-Vet liberally on affected area. Cover the affected area with downward strokes until mostly absorbed. Apply thick cotton wool around affected area (leg), then cover with a non-stretchable stable bandage. Repeat procedure every second day

Without bandage:

Apply Ice-Vet liberally to the affected area. Rub and massage the affected area with downward strokes for at least 60 seconds after application. Repeat procedure two times per day. If a horse is going to be competing in an event, the application must be done 30 minutes before the event.

PACKAGING

500ml
